PROJECTS

Resume Builder Web Application Project Link

- Developed a resume builder application using React.js with dynamic forms for entering personal, educational, and
- professional information.
- Implemented live resume preview functionality to display entered information dynamically.
- Integrated Axios and JSON Server to manage resume-related data through API requests.
- Added job-role-based professional summaries and skill suggestions to assist users in preparing resumes.

ReduxCart Project Link

- Developed an e-commerce frontend using React.js and Redux.
- Implemented product browsing, pagination, cart, and wishlist functionality.
- Used session storage to maintain product data.

BookStore Project Link

- Developed a responsive e-commerce application featuring dynamic product listings, shopping cart management, and
- wishlist functionality.
- Implemented centralized state management using Redux Toolkit to manage cart and wishlist data across components.
- Integrated REST APIs to fetch product data dynamically and display it in the user interface.
- Designed a responsive user interface using Bootstrap to provide a consistent shopping experience across devices.
